Section 4. First Aid Measures

Eye Contact	Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Do not use an eye ointment. Seek medical attention.
Skin Contact	Wash contaminated skin with soap and water. If the product got onto the clothes portion of the body, remove the contaminated clothes as quickly as possible. Place the victim under a deluge shower. If irritation occurs, seek medical attention. Wash contaminated clothing before reusing.
Inhalation	Allow the victim to rest in a well ventilated area. Oxygen may be administered if breathing is difficult. If irritation, or difficult breathing, persists, seek immediate medical attention.
Ingestion	Do not induce vomiting. Have conscious person drink several glasses of water or milk. NEVER give an unconscious person anything to ingest. Seek medical attention.
Notes to Physician	Sudden death due to ventricular fibrillation has been reported from acute inhalation in chronic solvent abusers. Treat patient supportively. Wilsonart® 860/861**Fire Fighting Media and Instructions****SMALL FIRE:** Use DRY chemical powder.**LARGE FIRE:** Use alcohol foam, water spray or fog. Cool containing vessels with water jet in order to prevent pressure build-up, autoignition or explosion.**Protective Clothing (Fire)**

Fire fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

Special Remarks on Fire Hazards

Vapor may travel considerable distance to source of ignition and flash back. Container explosion may occur under fire conditions or when heated.

Special Remarks on Explosion Hazards

All electrical equipment in the area must be rated for flammable liquids. [Dispensing - Class I Division 1; Storage - Class I, Division 2]

Section 6. Accidental Release Measures**Small Spill and Leak**

Absorb with an inert material and place in an appropriate waste disposal container.

Large Spill and Leak

Flammable liquid. Eliminate all ignition sources. Stop leak if without risk. Prevent entry into sewers, basements or confined areas; dike if needed. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Do not use metal tools or equipment.

Section 7. Handling and Storage**Handling**

Avoid breathing vapors of this product. Use only with adequate ventilation. Avoid contact with skin and eyes. After handling, always wash hands thoroughly with soap and water. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. When using do not eat, drink or smoke.

Storage

Store and use away from heat, sparks, open flame, or any other ignition sources. Flammable materials should be stored in a separate safety storage cabinet or room. Keep out of the reach of children. Ground all equipment containing material.

Section 8. Exposure Controls/Personal Protection**Engineering Controls**

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

Personal Protection**Eyes** Splash goggles or safety glasses with side shields.**Body** Synthetic apron.**Respiratory** In case of insufficient ventilation, wear an approved (NIOSH) respirator with organic vapor cartridges with dust/mist pre-filter.**Hands** Gloves (Viton, nitrile, or neoprene).**Feet** No special precautions are necessary if used as intended.**Protective Clothing (Pictograms)****Personal Protection in Case of a Large Spill**

A self contained breathing apparatus should be used to avoid inhalation of the product. Boots. Full suit. Splash goggles. Gloves (Viton, nitrile, or neoprene).
